SUMMARY

Senior PHP/Laravel engineer with 11 years building and scaling backend systems. Led the backend at Fooddarzee, scaling a subscription ERP to **5,000 active subscribers** and **4,000+ daily orders**; led a team of 4 engineers; cut AWS hosting costs **~40%** via a serverless migration. Now extending into AI/agent system design — built Sivon HQ with 29 agents in production.

EXPERIENCE

Senior Backend Developer — Fooddarzee

Remote · Jul 2019 — Jul 2025

Meal-subscription platform · Led team of 4 (2 BE + 2 FE)

- Owned the backend of a meal-subscription platform that scaled to **5,000 active subscribers** processing **4,000+ meal orders daily**, with no rewrite.
- Designed the **subscription engine** with date-level customization (veg days, skips, address changes) and preference-driven order calculations for 4,000+ daily deliveries.
- Architected a **multi-role ERP system** (Super Admin, Admin, Nutritionist, Chef, Customer) — each role with bespoke workflows over a shared data layer.
- Designed and tuned **MySQL** schemas, indexing strategy, and query plans for high-write subscription/order workloads.
- Led migration of the public website to **AWS serverless** (Lambda + CloudFront + S3), **cutting hosting costs ~40%**.
- Led a team of 4 engineers** (2 backend, 2 frontend); ran code reviews, enforced standards, mentored juniors, coordinated with Product, Ops, and Mobile.
- Integrated **Razorpay** and **Juspay** for one-time and recurring payments (thousands of transactions monthly); **Zoho** for invoicing via OAuth2; Firebase Cloud Messaging + SMS gateways for transactional alerts.
- Built **CI/CD pipelines using GitHub Actions** for automated build, test, and deployment.
- Automated manual order-processing workflows, **saving the operations team 10+ hours/week**.
- Stack: **PHP, Laravel, MySQL, AWS** (EC2, Lambda, CloudFront, S3), Redis, GitHub Actions.

Founder & Solo Developer — Sivon HQ · MakeToCreate · StatusLink

Remote · Jan 2026 — Present

- Built **Sivon HQ** end-to-end as a solo developer: a multi-agent AI marketing platform with **29 agents** in production. Designed system architecture, observability, multi-tenant data model, billing, and deployment.
- Built supporting tooling and infrastructure: eval harness, cost attribution, PII redaction at the agent boundary; SOC 2 + GDPR-aligned architecture.
- Operate production infrastructure solo: incident response, billing reconciliation, customer support, deployment automation.
- Stack: **Next.js, TypeScript, Python, Supabase** (PostgreSQL, Auth, RLS), **Cloud Run, Vercel**.

Co-Founder & Technical Lead — Frocery Innovative Retail Pvt. Ltd.

Mumbai · Jan 2018 — May 2019

- Co-founded and tech-led an end-to-end grocery e-commerce platform — backend, mobile apps, payments, and delivery operations.
- Built REST APIs and CMS using **PHP (CodeIgniter)**; developed Ionic + Angular mobile applications.
- Integrated Razorpay payments and Firebase push notifications; made all technical decisions across backend, mobile, and ops infra.

Assistant System Analyst — Gray Matrix Solutions

Mumbai · Feb 2016 — Oct 2017

- Developed hybrid mobile applications (Ionic + AngularJS) and backend APIs supporting multiple concurrent client projects.

Technical Trainer & Developer — Suven Consultants & Technology

Mumbai · Dec 2014 — Oct 2015

- Developed PHP web applications and internal tools; **trained 15–20 interns** in PHP, MySQL, HTML/CSS, and MVC architecture.

SELECTED PROJECTS

Fooddarzee ERP — Multi-role ERP for a meal-subscription business at **5,000 active subs · 4,000+ daily orders**. Backend architecture, subscription engine, payments, AWS serverless migration. *Laravel · PHP · MySQL · AWS · Razorpay · Juspay.*

Sivon HQ — Multi-agent AI marketing platform built solo. 29 agents across 7 engines. Multi-workspace · eval harness · observability. *Next.js · TypeScript · Python · Claude · Supabase.*

codeprobe — Open-source code analysis tool covering security, performance, error handling, SOLID, and design pattern audits. *Python.*

SKILLS

Backend: PHP (OOP, MVC, 10+ yrs), **Laravel** (advanced, 7+ yrs), Node.js (TypeScript), Python

Databases: **MySQL** (schema design, indexing, query optimization), PostgreSQL, Firestore, Redis

Frameworks & Frontend: Laravel, **Next.js** (App Router, SSR, RSC), React, Vue.js, Blade, CodeIgniter, jQuery

Cloud & DevOps: **AWS** (Lambda, EC2, S3, CloudFront), Google Cloud (Cloud Run, Firestore), Vercel, Supabase (Auth, RLS), Linux server admin, DNS, SSL

CI/CD & Build: **GitHub Actions**, Composer, npm, Webpack, Vite, PHPUnit

APIs & Integrations: **REST API design**, GraphQL (consumption), **OAuth2**, Razorpay, Juspay, Stripe, Zoho, Trello, Jira, Firebase Cloud Messaging, SMS gateways

AI / LLM: **Claude** (tool use, prompt caching, agent design), multi-agent system design, LLM observability, prompt engineering, AI-assisted development

Practice: System architecture, multi-tenant SaaS, subscription/billing systems, ERP design, code review, team leadership, mentoring, technical documentation, remote/async collaboration

EDUCATION

Bachelor of Engineering (Computers) — Mumbai University · 2015
